Skills

- Punctual.
- Responsible.
- Team player.

About me

I am a software developer. I find in me a huge passion for learning how to use new technologies and implement them in the development of complex systems.

Knowledge Sectors

- Web and Mobile Development.
- Software Engineering.
- Networking.
- Artificial Intelligence.
- Cloud & DevOps.

Experience

LONGBIT

February 2020 - January 2021

- Handling MVVM architecture. (Kotlin)
- Consumption of microservices (API's).
- Consumption of webservices (Rest/SOAP).
- Integration of design concepts and push notifications.(XML,FireBase)
- Module testing.
- Version control (GitHub).

LIBERATO SOFTWARE

April de 2019 - January de 2020

- UI/UX design and implementation within some projects (React).
- Webserver and microservices development. (Node, MySQL, NoSQL)
- Maintenance and update of the system.

Achievements

SAVIPS — System focused on the area of psychology in charge of determining the stress level of a patient through the use of AI and Machine Learning tools.

KAANS — Through this application and in coordination with members of CONALITEC, an alternative was sought to complement the way in which 6th grade students could acquire quality knowledge by classifying them according to their learning style.

INVERNADERO 2020 — The design of an embedded system covering all the variables that have to be considered within a greenhouse for the cultivation of a certain plant species; managed through a mobile application with connection to Arduino IoT Cloud was made.

Education

CECYT 3, IPN

Computer Technician.

ESCOM, IPN

Computer Systems Engineering.
