ABOUT ME

I'm a Software Engineer with 6+ years of experience building scalable systems and leading projects that blend software engineering with data science and ML. My expertise spans web technologies, cloud infrastructure, and distributed architectures. I'm passionate about solving complex problems and designing data-driven solutions that deliver measurable business impact.

TECHNOLOGIES

Cloud	Data	Frontend	Backend
 AWS	 Hive	 React	 Go
 Linux	 Redis	 Flutter	 Nest
 Docker	 DynamoDB	 Three.js	 Python
 Airflow	 PostgreSQL	 Angular	 Node.js

EDUCATION

B.S. in Computer Systems Engineering
National Polytechnic Institute (Mexico)

Associate Degree in Programming
National Polytechnic Institute (Mexico)

- Spanish
- English

CERTIFICATIONS

WORK EXPERIENCE

Software Engineer - Lyft

April 2024 - Present

- Designed and developed secure, scalable systems powering dynamic pricing and forecasting algorithms within high-performance, data-intensive architectures. (Python, Go, Hive)
- Led cross-functional initiatives integrating machine learning and data science workflows to drive multi-million-dollar revenue growth through pricing optimization strategies.

Sr. Backend Developer - Svitla Systems

June 2023 - March 2024

- Engineered scalable and trustworthy software components tailored for seamless interaction with a variety of systems in the resort industry (Node.js, PostgreSQL, DynamoDB, S3).
- Performed comprehensive analysis, design, and assessment of software solutions with a specialized focus on serverless clean architecture (AWS Lambda, SQS, SNS, Gateway, Cloudwatch)

Software Engineer - Lynx Automation

October 2021 - June 2023

- Developed scalable and reliable software components to interact with smart gadgets and vendor API's in an up-and-coming IoT startup (Node.js, Hapi.js, MySQL, MongoDB)
- Deployed, tested and maintain software modules on a high performance system implementing concurrent design with an asynchronous architecture (AWS Lambda, SQS, SNS, EC2)

Full Stack Developer - Liberato Software

July 2018 - April 2020

- Worked on the multiple software projects simultaneously and participated in the whole software development process from design to implementation (Angular, GraphQL, Node.js)
- Developed and implemented tools which increased the level of automation and efficiency of installing and configuring servers (AWS RDS, ElastiCache, EC2, CodePipeline, Docker)
